TECHNICAL CONSULTANT

Technical Consultant with strong coding skills in Python, Bash, and Groovy, and hands-on experience with AWS, Terraform, and CI/CD tools. Experienced in managing technical projects, improving cloud security, and automating infrastructure. Skilled at working with enterprise cross-functional teams, communicating with stakeholders, and supporting Agile workflows. Seeking roles that blend both technical expertise and project management to drive impactful business outcomes.

WORK EXPERIENCE

Accenture   **Tampa, FL**
Technology Architecture Specialist   June 2025 - Present
- Led a proof of concept exploring new Snowflake features, including Container Services with Docker, and presented key findings to stakeholders - directly impacting strategic decisions and shaping project direction
- Developed dynamic CI/CD Jenkins pipelines to automate AWS resource deployment for IAM, KMS, and S3, significantly reducing runtime from 35 to 5 minutes for FinOps projects
- Enhanced Python, Bash, and Groovy scripts to support new functionality across multiple client automation workflows - improve efficiency and reducing manual intervention
- Document technical findings and workflows in Confluence while managing user stories and sprint progress in Jira to support Agile delivery and cross-team collaboration

Technology Architecture Senior Analyst   December 2022 - June 2025
- Collected technical details from client application teams on project use-cases, protection methods, and workload environments to develop comprehensive design documents in Microsoft Word, driving alignment between project execution and business objectives
- Managed project management and BAU tasks such as maintaining status slide decks for leadership, tracking technical use-cases via Excel, and creating technical runbooks, which helped streamline ongoing operations
- Configured and maintained virtual machines running a SaaS vendor tool, handling patch updates, cluster configurations, and license management, resulting in increased system stability and reduced downtime

Technology Architecture Analyst   January 2022 - December 2022
- Created design flows using Microsoft Visio to outline protection strategies, including tokenization and masking, resulting in enhanced security measures
- Performed technical security review of client's AWS foot print and gathered metrics on security controls, including IAM permissions and CloudTrail configurations, to offer actional recommendations
- Managed container security via Palo Alto's Prisma Compute tool and created technical runbooks to streamline compliance measures

SKILLS & CERTIFICATIONS

Programming Languages: Python, Groovy, Bash
Cloud & DevOps: Terraform, Amazon Web Services, Git, Jenkins, RedHat OpenShift, Docker, Kubernetes
Data & Databases: SQL, Snowflake
Project Management: Powerpoint, Excel, Word, Jira, Confluence
Certifications: Hashicorp Terraform Associate (http://www.credly.com/badges/b30127f1-6060-4fe5-aa58-48c767af882e/public_url)

EDUCATION

The George Washington University   **Washington, D.C.**
Bachelors of Science in Public Health & Minor in Bioinformatics   Aug 2018 - Dec 2021
- **Cumulative GPA:** 3.82; Summa Cum Laude, Dean's List
